

SuiteCRM Duplicate Detector

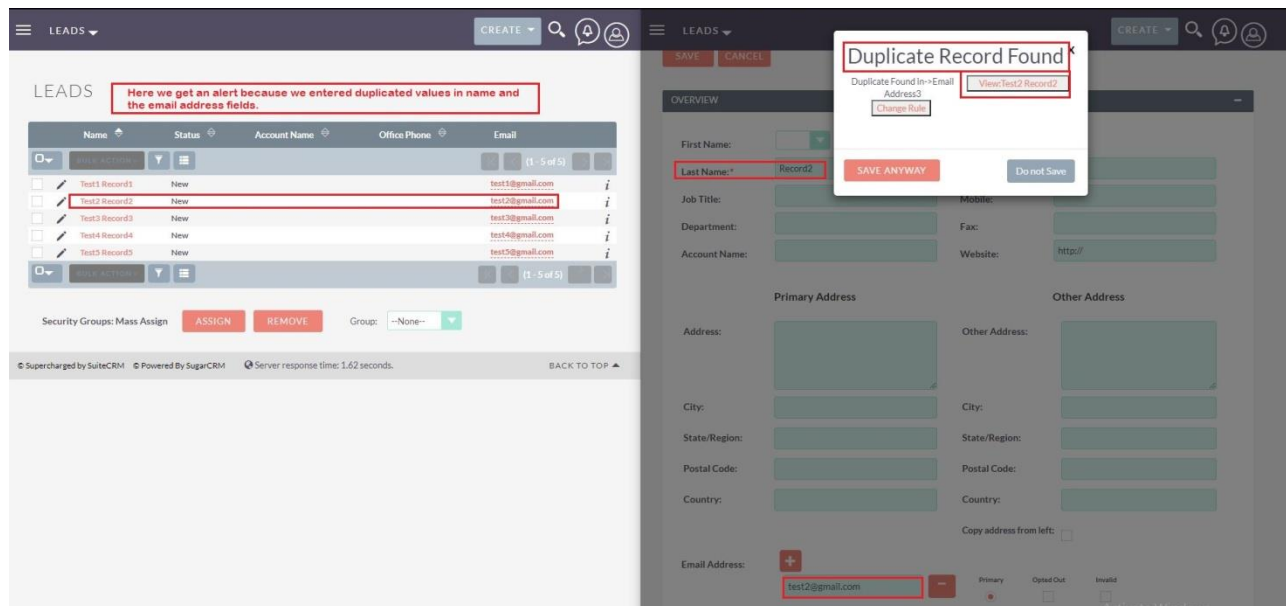

## User Guide

## User Guide:-

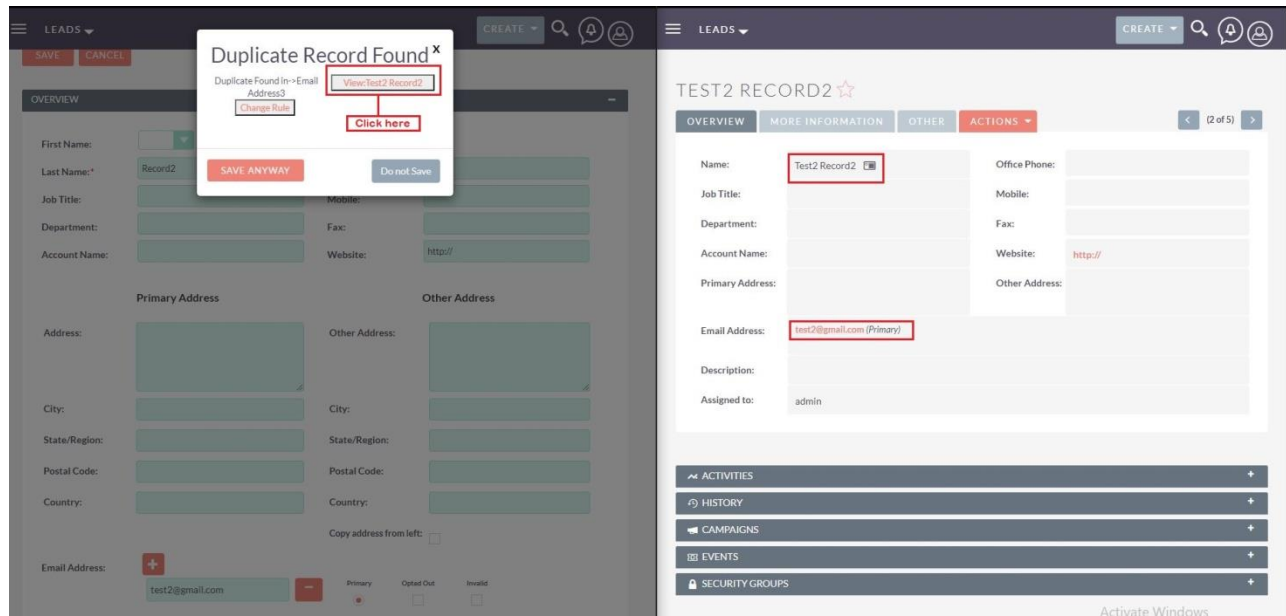

1. Right now, the plugin is configured for the leads module and below mention fields. Also there are test record in the module.

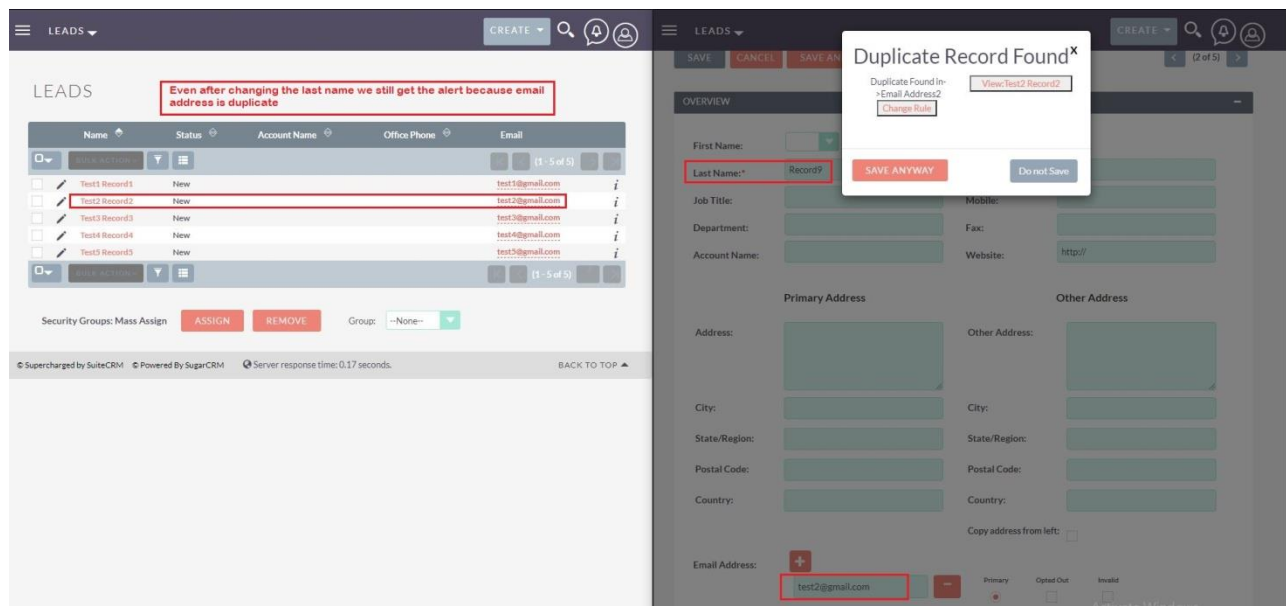

2. Here we get an alert because we entered duplicated values in name and the email address field.

3. Click on button at right side of dialog box to see duplicate record.

4. Even after changing the last name we still get the alert because email address is duplicate.

## 5. Enable the Exact match option and the record will be saved.

DUPLICATE DETECTOR FOR LEAD MODULE ☆
