

Restore Record Manager

Overview

Restore Record Manager is for restoring your data which has been deleted from your suiteCRM.

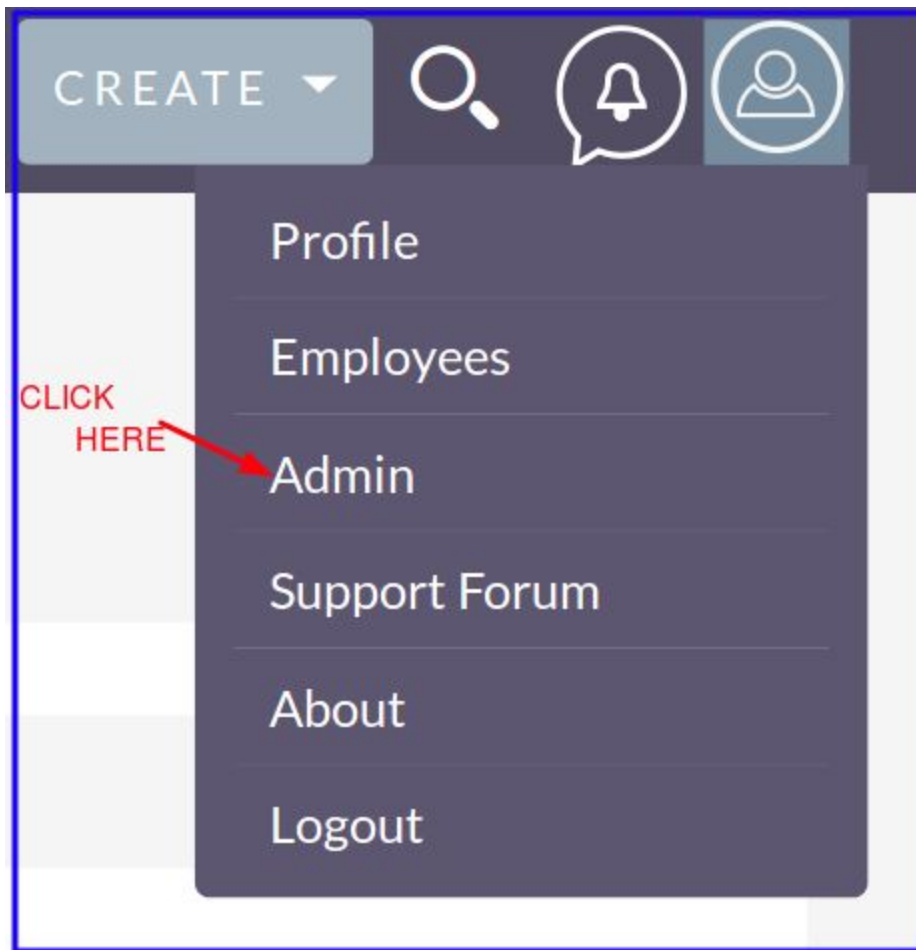

Prerequisite

CRM should have the Outright utils file, if not then install the prerequisites package first then install the Restore Record Manager.

Installation Guide

Go to Administration page and click on “Module Loader”.
Browse the SuiteCRM Theme Style Builder file and select the package.
Click on the upload button.
Click on the install button.
Click on commit button to finish the installation.

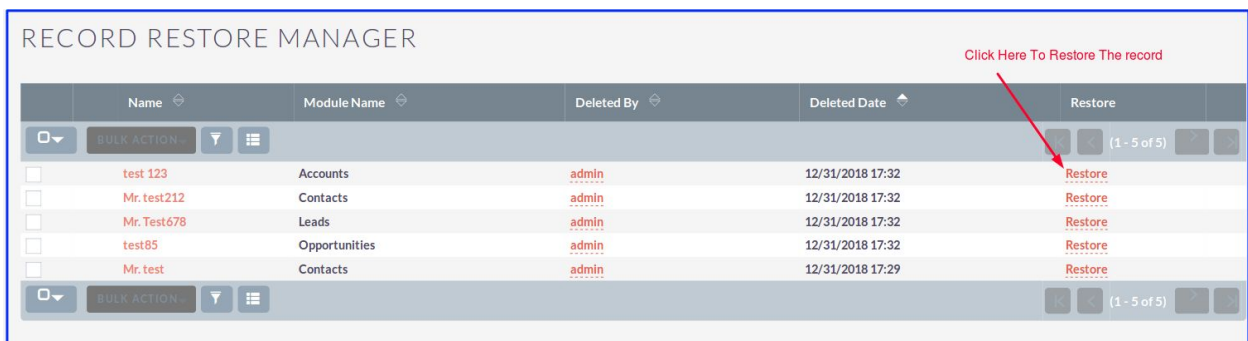

1 Go to the admin section

2 Click on the Record Restore Manager

3. You will see all the deleted records which you can restore

4. Mass Restore is for restoring multiple records with single click.
